# SCHOOL BUILDING

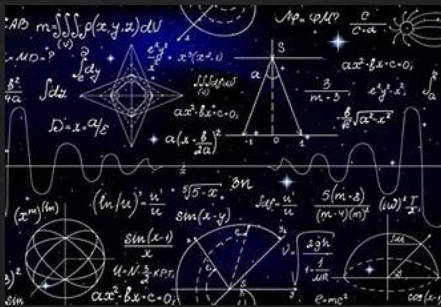

Our school is located in Radom. It is one of the biggest primary schools in the city. It has existed for almost 25 years (since 1997). The school building is big, beside the main building there are two gyms, courts, a swimming pool and playgrounds.

# SCHOOL SUBJECTS

We study the following subjects

- Polish
- Mathematics
- History
- English
- German
- Biology
- Nature
- PE
- Music
- Art
- Technology
- Physics
- Chemistry
- Geography
- Religion
- Information
- Social studies
- Safety education
- Family life education

What's interesting,

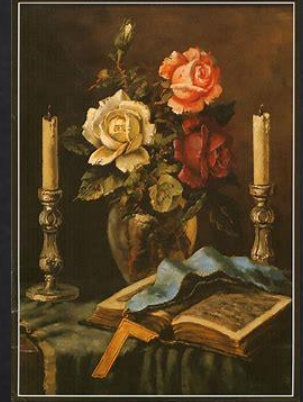

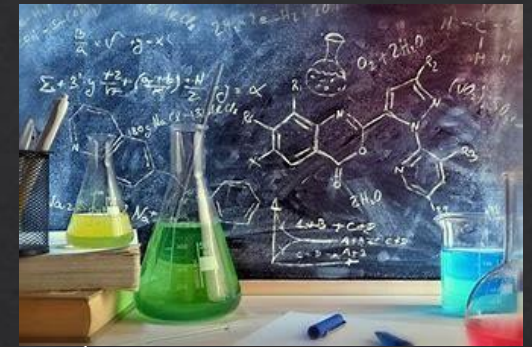

German, Physics and Chemistry are for 7th and 8th grades students

Nature is a combination of biology and geography (it is only in 4th grade).

Technology finishes in sixth grade, but music and art in seventh grade.

Safety Education and Social Studies are only in 8th grade.

There is a Family Life Education from fourth to eighth grade, but this lesson is only for one semester out of two.

# Teachers

In my school most of the teachers I know are really friendly and nice. Some of them aren't as fine as others, but they teach very well. I really like my tutor, who understands young people and is very pleasant. She taught me technology and now IT. Looking at the languages I learn, I love learning German. The German teacher is also very sympathetic and understanding. With this lady, not only are the lesson enjoyable, but also understandable! The Chemistry teacher is a very positive person that always tries to explain the lesson subjects to us. These three teachers are my favourite ones. I think it matters a lot if my teachers are being fair to my classmates. I try not to look at what the teachers are like, but how they teach.

# School trips

School trips are very beneficial when it comes to e.g other cities because then you know new interesting places. Such trips last from three to five days. Going to the Cinema is a popular option for occasions such as a Boys' Day. Then we watch different, interesting films. We usually go for a walk because the cinema is close but it's also healthy and fun. There are also trips abroad in the eighth grade, we call them farewell to the school finishers, and they usually last eight days.

# Distang learning

Times are what they are and they are not easy for anyone. Online learning and sitting at home is slowly exhausting every student and teacher. More and more people are already suffering from depression. However, I believe that not everyone dies because of the virus as they say. Sometimes people die of leukaemia and they report patient's death caused by coronavirus. In my opinion this virus is no more dangerous than the flu. A lot of people also slowly stop believing in the virus, including me.
